

Healthier tomorrows begin with supporting smoking cessation

At Johnson & Johnson, we're supporting perioperative smoking cessation to help lower the risk of complications and reduce time spent in hospital.¹⁻³

1. Herrero C *et al. J Orthop.* 2020;21:390–4. 2. Möller AM *et al. Lancet.* 2002;359(9301):114–7. 3. Lindström D *et al. Ann Surg.* 2008;248(5):739–45. Johnson and Johnson Medical Pty Ltd 1–5 Khartoum Rd, North Ryde NSW 2113, Australia. Date of preparation: November 2021. 189904-210920.

Patients who are successful at smoking cessation before joint replacement surgery are:

Up to **50%** less likely to have complications¹⁻³

More likely to **spend less time** in hospital²

Help start their journey to **quitting for good**

Easy and practical support to assist patients with smoking cessation ahead of surgery

Our pack contains:

MY QUIT GUIDE

booklet with information about the benefits of smoking cessation and tips for how to quit

NICORETTE® KIT

including QUICKMIST & INVISIPATCH®

The pack is available to patients who are undergoing joint replacement surgery with a DePuy Synthes implant.

Nicorette is a stop smoking aid and contains nicotine.

Contact your DePuy Synthes representative to request packs for your patients.
