

HCPCS CODES APPLICABLE TO ACCLARENT PRODUCTS

This guide has been developed to assist you in obtaining hospital reimbursement for Acclarent products used in the hospital outpatient setting. Medicare uses C-codes to track device cost information for future APC rate-setting purposes. No additional payment will be provided to the facility. All appropriate C-codes should be added to the hospital's charge master to report device costs used in the outpatient setting. CMS will reject a hospital claim if the appropriate tracking code is not identified on the claim when a device-dependent procedure is performed. The following table lists relevant device C-codes that may apply to Acclarent products:
