

2022 Plastics: Panniculectomy/Abdominoplasty/ Lipectomy Reimbursement Guide

The information contained in this document is provided for informational purposes only and represents no statement, promise, or guarantee by Ethicon concerning levels of reimbursement, payment, or charge. Similarly, all CPT, ICD-10 and HCPCS codes are supplied for informational purposes only and represent no statement, promise, or guarantee by Ethicon that these codes will be appropriate or that reimbursement will be made. It is not intended to increase or maximize reimbursement by any payor. We strongly recommend that you consult your payor organization with regard to its reimbursement policies.

Finding the appropriate ICD-10-PCS Code¹

STEP 1: Select the code below that best describes the procedure.

Procedure Code	Description (Includes Body Part)	Procedure Code	Description (Includes Body Part)
0J0	Alteration / Subcutaneous Tissue and Fascia	0X0	Alteration / Anatomical Regions, Upper Extremities
0W0	Alteration / Anatomical Regions, General	0Y0	Alteration / Anatomical Regions, Lower Extremities
0WQ	Repair/Abdominal Wall		

STEP 2: Using your coding reference book or software, select the 4 characters that best describe the associated Body Part, Approach, Device and Qualifier in the respective order.

Given the large number of individual procedure codes available for lipectomy procedures, please refer to your coding reference book or coding software to look up the associated Body Part, Approach, Device and Qualifier that best align to the procedure code you identified in Step 1 above.

STEP 3: Combine the characters in the respective order from left to right. This is your ICD-10-PCS Code.

For example, the code for Alteration of Face, Open Approach (0W020ZZ) would be created in the steps below:

Example: STEP 1: 0W0 + STEP 2: Body Part 2 + Approach 0 + Device Z + Qualifier Z = STEP 3: 0W020ZZ

NOTE: Average MS-DRG payments are at highest potential, since most hospitals do meet the EHR and quality reporting. Other adjustments are hospital-specific.

*CC stands for Complications and Comorbidities while MCC refers to Major Complications and Comorbidities. These are a measure of the severity of an illness indicating additional diagnoses present on a case that may increase the expected resource consumption beyond that of the same case without a CC or MCC under the current Medicare definition. Whether a complication or comorbidity is classified as a CC or MCC is defined by Medicare.
