Mini open L4-5 TLIF Using ViviGen® MIS, X-PAC® Expandable Interbody Cage and EXPEDIUM VERSE™ Pedicle Screw System

Dr. Wissam Asfahani
MD, FAANS

“Through the small delivery cannula, ViviGen MIS allows precise, quick and hassle-free bone grafting placement into tight disc preps during minimally invasive approaches.”

“X-PAC expandable interbody cage has a small lateral footprint allowing for safe placement without undue retraction on the thecal sac. The expansion process is smooth and precise.”

Dr. Asfahani is presenting on behalf of DePuy Synthes Spine. The presentation reflects the opinions of the individual presenter, and the steps described may not encompass the complete steps of the procedure.
